EXPERIENCE

Microsoft | [Software Engineering Intern, Business AI](#) | Jan – Apr 2020 (Ongoing)

- Working to enhance the performance of Microsoft's prediction pipeline for business insights in **Python** and **Spark**

Broadway Technology | [Software Engineering Intern](#) | May – Aug 2019

- Developed support for new class of bonds within Broadway's trade querying and subscription system using **C++** and **Python**
- Enhanced trade times to microsecond precision by revamping code to the latest FIX trading protocol
- Reduced code complexity by refactoring Broadway's trading platform to use generic libraries / templates
- Unblocked critical software releases for clients through fixing 10+ showstopping code and environmental bugs

SnapTravel | [Software Engineering Intern](#) | Sept – Dec 2018

- Profited an estimated sales impact of \$5M USD in 2019 by developing a loyalty rewards **Flask** microservice for business travelers
- Enabled production launch by creating a dashboard to easily manage the lifecycle of loyalty credits in **Django**
- Saved team 50+ hours / week by implementing a PDF library in **Python** to autogenerate and upload invoices
- Increased user ratings for bookings by 0.2 / 5 stars by redesigning dynamic order emails with product teams

Novus Health | [Software Engineering Intern](#) | Jan – Apr 2018

- Decreased turnaround for crafting questionnaires from hours to minutes by implementing a drag-and-drop builder using **React / Redux**
- Reduced entry update times by 40% by composing and automating data import tools in **PHP** and **SQL**
- Exposed crucial data for clinical requests by creating 10+ **REST APIs** to integrate with third-party services
- Improved developer productivity by implementing a text parser to autogenerate API documentation using **Laravel**

Genesys | [Software Engineering Intern](#) | May – Aug 2017

- Served hundreds of calls daily by building a media control suite for audio recording and playback in **C++**
- Boosted sound quality by up to 50% by extending support for the next-generation Opus audio codec
- Cut development wait times for pushed builds by 4x by implementing a build status report system in **Python**

EDUCATION

Bachelor of Computer Science | [University of Waterloo](#) | Sept 2016 – Apr 2021

- Coursework on Operating Systems, Data Structures & Algorithms, Concurrency, Compilers, Artificial Intelligence

PROJECTS

3D Dogfighter 🐉 ["Most Over-the-Top" Prize Winner at Waterloo Game Jam 2017](#)

- Developed a multiplayer aerial combat game in **C#** with **Unity**
- Integrated server networking logic with matchmaking system for hosting 20+ concurrent users
- Designed combat and flight mechanics, user interface and 3D terrain for maps

Student Management System 🐉

- Implemented a database to manage 1000+ student records using **LAMP Stack**
- Designed robust input sanitation and validation using error handlers and regular expressions in **PHP**

SKILLS

Languages: Python, Java, JavaScript (ES6), C++, C#, Go, SQL, R, Bash

Frameworks/Tools: React, Redux, Flask, Spark, Node.js, Laravel, Django, Android, Docker, Redis, Git
