EXPERIENCE

Microsoft | Incoming Software Engineering Intern, Business AI | Jan – Apr 2020

Broadway Technology | Software Engineering Intern | May – Aug 2019

- Developed support for new class of trading instruments within Broadway's trade querying and subscription system using C++ and Python
- Enhanced trade times to microsecond precision by revamping code to the latest FIX trading protocol
- Reduced code complexity and duplication by using generic libraries / templates for Broadway's trading platform
- Unblocked major software releases for clients through fixing 10+ showstopping code and environmental bugs

SnapTravel | Software Engineering Intern | Sept – Dec 2018

- Profited an estimated gross sales impact of $5M USD (GMV) for 2019 by developing a loyalty rewards Flask microservice for business travelers
- Created a utility to manage the lifecycle of loyalty credits in Django, used hourly to resolve customer incidents
- Saved upwards of 50 hours / week by implementing a PDF library in Python to autogenerate and upload invoices
- Increased booking ratings by 0.2 / 5 stars by collaborating with product teams to redesign dynamic order emails

Novus Health | Software Engineering Intern | Jan – Apr 2018

- Decreased turnaround for publishing campaigns from hours to minutes by designing and implementing a dashboard for crafting medical questionnaires using React / Redux
- Reduced entry update times by 38% by composing and automating data import tools in PHP and SQL
- Exposed critical data for clinical requests by creating 10+ REST APIs to integrate with third-party services
- Improved developer productivity by implementing a text parser to autogenerate API documentation using Laravel

Genesys | Software Engineering Intern | May – Aug 2017

- Served hundreds of call transmissions daily on the principle voice platform by building and deploying a media control suite for audio recording and playback in C++
- Boosted sound quality by up to 50% by extending support for the next-generation Opus audio codec
- Cut development wait times for pushed builds by 4x by updating a build status report system in Python

EDUCATION

Bachelor of Computer Science | University of Waterloo | Sept 2016 – Apr 2021

- Robotics Club, Computer Science Club, Intramural Ultimate Frisbee, President's Scholarship (95+%)

PROJECTS

3D Dogfighter ⌥ *"Most Over-the-Top"* Prize Winner at Waterloo Game Jam 2017

- Developed a multiplayer aerial combat game in C# with Unity
- Integrated server networking logic with matchmaking system for hosting 20+ concurrent users
- Designed combat and flight mechanics, user interface and 3D terrain for maps

Student Management System ⌥

- Implemented a database to manage 1,000+ student records using LAMP Stack
- Designed robust input sanitation and validation using error handlers and regular expressions in PHP

Re-Vim'd ⌥

- Programmed a clone of Vim editor in C++ based on MVC architecture, with 40+ commands and enhancements

SKILLS

Languages: Python, Java, JavaScript (ES6), C++, C#, Go, SQL, R, Bash

Frameworks/Tools: React, Redux, Flask, Node.js, Laravel, Django, Android, Docker, Redis, Git, PostgreSQL
